

Effects of Corona N and KSC Micro Mix on Mature Christmas Trees

Crop:

Christmas Trees

Researcher:

Stacey Mullen
Timac Agro USA

Site Location:

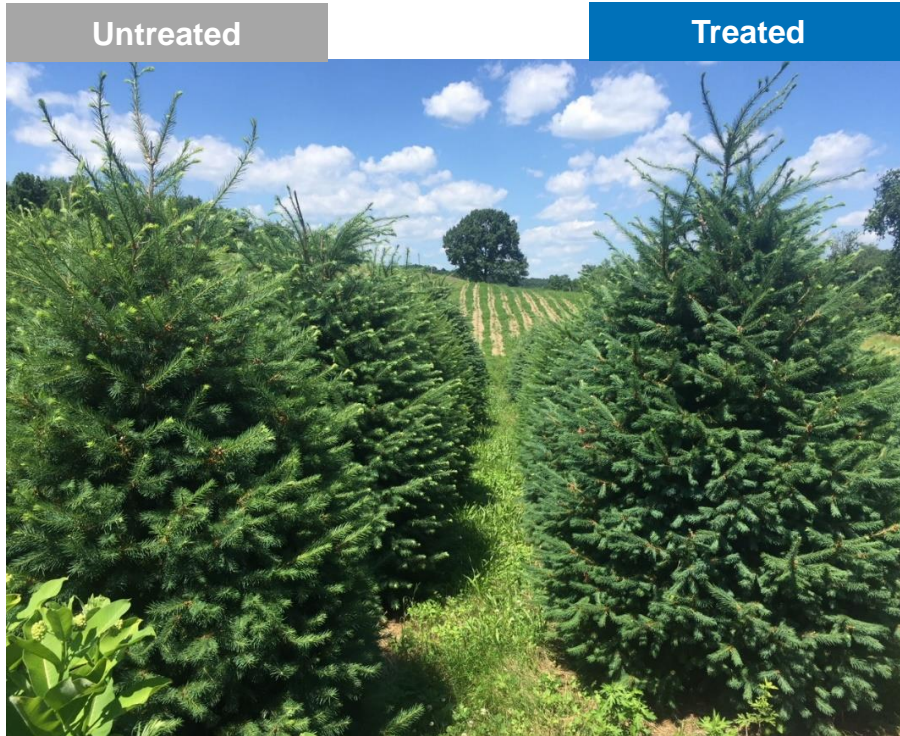

Berks County, PA

OBJECTIVE

To test the water soluble formulas on mature Christmas trees to improve growth and color. These trials were enacted to evaluate timing and product efficacy on a Christmas tree farm in PA.

RESULTS

Tissue tests were taken and demonstrated improved nutrition, and this resulted in improved vigor. The treated trees were a darker green.

STUDY INFORMATION

Variety	Douglas Fir
Treatments	Corona N KSC Micro Mix

APPLICATION

Product	Application Rate	Timing
Untreated		
Corona N KSC Micro Mix	3 lbs/ac 1 lb/ac	Bud break and 2 weeks later
