Effects of Fertileader Elite on Yield

Crop:
Corn

Researchers:
Randy Smith, PhD - Mississippi State University
Timac Agro USA

Site Location:
St. Joseph, LA

OBJECTIVE

To determine the effects of Fertileader Elite applied at V10 on corn yield.

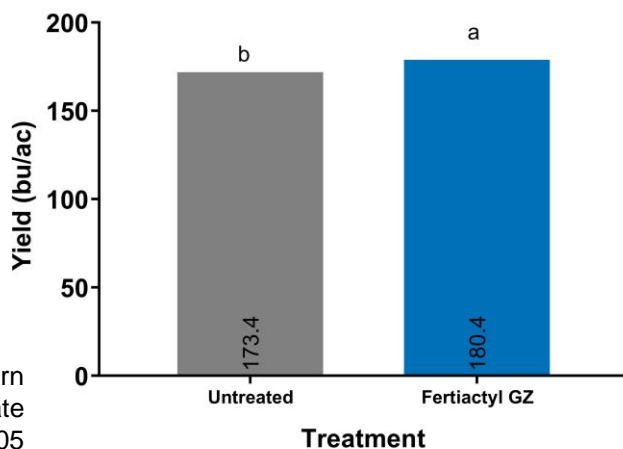

STUDY INFORMATION

Planting Date	29-Mar-2018
Harvest Date	5-Oct-2018
Hybrid	DKC 68-26 RR
Population	32,000
Trial Design	Randomized complete block, 6 replications

KEY FINDINGS

7 bu/ac increase in yield
\$14.84/ac ROI

Effects of Fertileader Elite on Corn Yield

Graph 2: Fertileader Elite effects on corn yield. Average of 6 plots, letters indicate significant different $p < 0.05$

APPLICATION

Treatment	Application Rate	Timing
Untreated Control		
Fertileader Elite	1.5 pt/ac	V10
