

Effects of Maxifruit on Gala Apple Size

Crop:
Apples (Gala)

Researchers:
Steve Zonneville and Alexander Duffy
Timac Agro USA

Site Location:
Wayne County, NY

OBJECTIVE

To test the ability of Maxifruit to size apples. The Gala was chosen because that is the toughest apple to get marketable size.

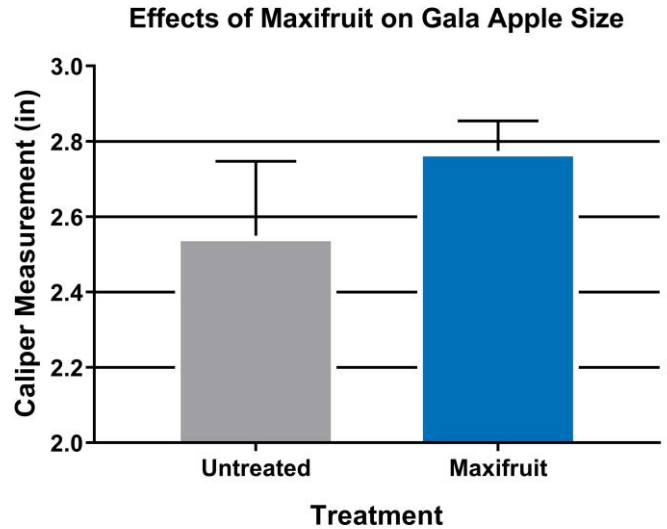

KEY FINDINGS

Increased fruit size by
9%

STUDY INFORMATION

Planting Date	5+ leaf
Harvest Date	9/2018
Variety	Gala
Acres	10+
Treatments	Maxifruit

Graph: Maxifruit effects on fruit size. 10 random apples were chosen and measured.

APPLICATION

Product	Application Rate	Timing
Untreated		
Maxifruit	2 qt/ac	After Chemical Thinning
