

### OBJECTIVE

To assess the plant response of foliar application of Fertileader Elite used in conjunction with grower standard program on southern highbush cultivar blueberry bush.

### SITE LOCATION

Baxley, GA

### RESEARCHER

Josh Lanier, CCA  
Timac Agro USA

### KEY FINDINGS

Trial ID: DT-20-SE-BLU-FLEL

The below photos were taken 30 days following application of Fertileader Elite (2 qt/a). The same fertigation program for both sections within this uniform planting were maintained during the trial.

Standard +

FERTILEADER®

- Use of Fertileader with grower standard foliar nutrition in tank mix during vegetative growth period shows better utilization of nutrients and increased plant photosynthesis
- Foliage and fruiting wood growth was expedited allowing for increased productivity
- Stronger internal fruiting wood allows for higher berry holding capacity going into harvest
